

Silver Start Aircraft Batteries

Pure Lead Tin VRLA Monobloc Batteries

Pure Lead - Tin, Valve Regulated Lead Acid Monobloc

The "Silver Start" range of on-board, sealed maintenance-free Aircraft start batteries from HBL NIFE use Thin, Pure lead-tin plates for enhanced performance.

Features:

- Excellent starting capability: very high peak power
- Fast-charge capability: 100% recharge in 2hrs
- More flying hours: long life
- Operation in wide temperature range: -40°C to +50°C
- Safety inside the aircraft: non-spillable absorbed electrolyte design
- Delivered fully charged, ready-to-use: no commissioning at site
- Flame Retardant V0 grade Container and Cover: UL Approved

Conformance Standards

Silver Start batteries conform to the MIL 8565J and IEC 952-1 standards.

Connector type

MS 18093 / MS 3509

SS10060

Silver Start Aircraft Battery

Rating: 24V, 10Ah @ 1hr to end 20V

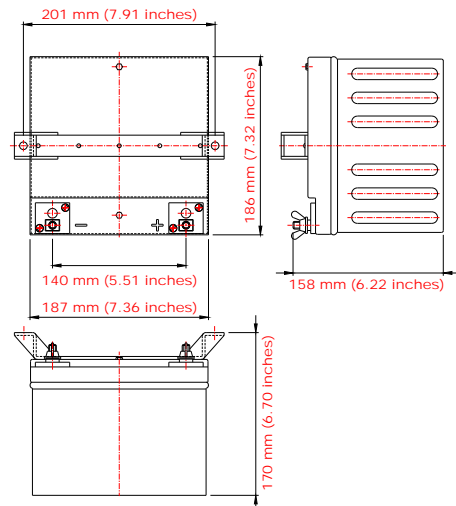

Weight: 13.0 Kgs (max)

Power Ratings at 23°C:

I_{pp} : 750 A

I_{pr} : 500 A

Dimensions (with box)

SS18060

Silver Start Aircraft Battery

Rating: 24V, 18Ah @ 1hr to end 20V

Weight: 21 Kgs (max)

Power Ratings at 23°C:

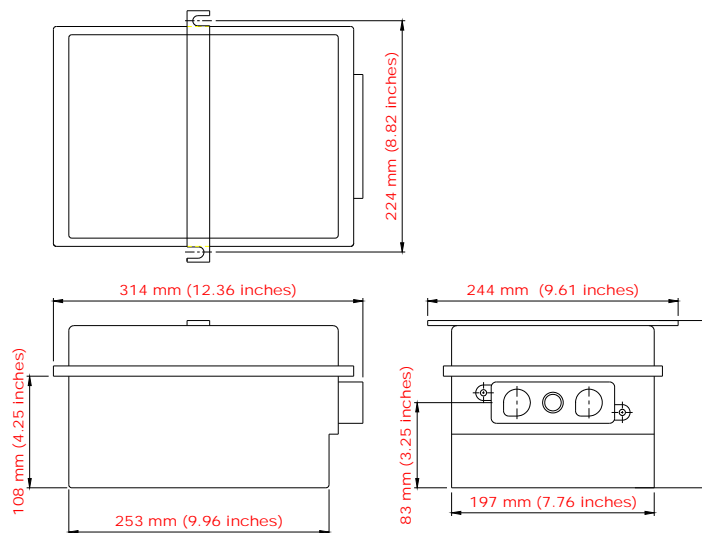

I_{pp} : 1250 A

I_{pr} : 700A

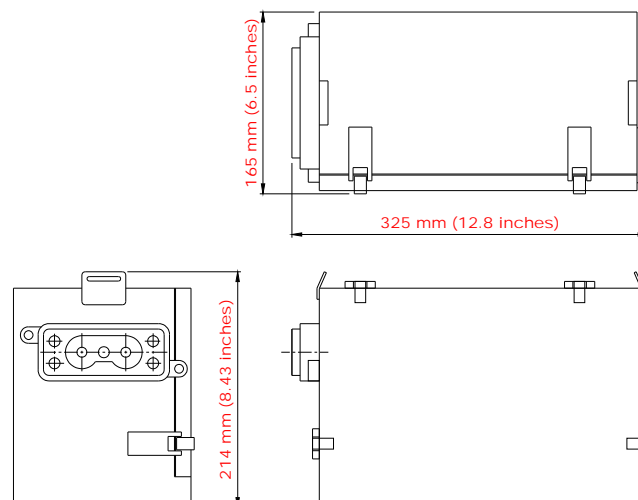

Dimensions (with box)

Format 1

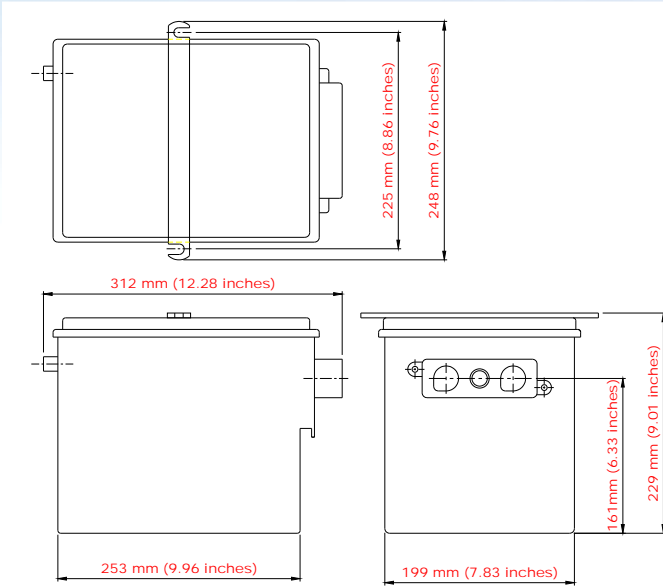

Format 2

Dimensions (with box)

SS25060

Silver Start Aircraft Battery

Rating: 24V, 25Ah @ 1hr to end 20V

Weight: 27 Kgs (max)

Power Ratings at 23°C:

I_{pp} : 1400 A

I_{pr} : 800 A

SS42060

Silver Start Aircraft Battery

Rating: 24V, 42Ah @ 1hr to end 20V

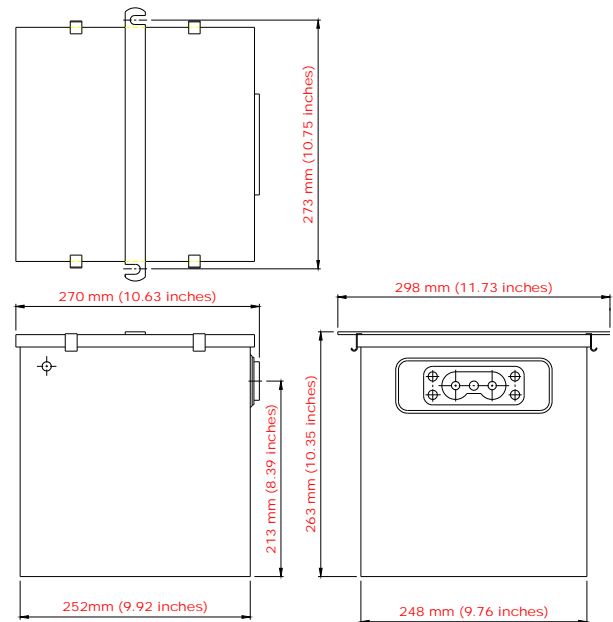

Weight: 42 Kgs (max)

Power Ratings at 23°C:

I_{pp} : 1550 A

I_{pr} : 1200 A

Dimensions (with box)
